SPECIAL TOPICS IN THE THEORY OF ELASTICITY: A VOLUME IN HONOUR OF PROFESSOR JOHN DUNDURS

	269	Preface
	271	John Dundurs—A biographical note
	273	A list of publications by John Dundurs
R. Ballarini	279	A certain mixed boundary value problem for a bimaterial interface
D. M. Barnett and **J. Lothe**	291	"Mutual" attraction of a dislocation to a bimetallic interface and a theorem on "proportional" anisotropic bimetals
Z. P. Bažant and **Y. N. Li**	303	Penetration fracture of sea ice plate
B. Budiansky, A. G. Evans and **J. W. Hutchinson**	315	Fiber–matrix debonding effects on cracking in aligned fiber ceramic composites
S. Y. Chen, T. N. Farris and **S. Chandrasekar**	329	Contact mechanics of Hertzian cone cracking
I. M. Daniel and **G. Anastassopoulos**	341	Failure mechanisms and damage evolution in crossply ceramic-matrix composites
J. P. Dempsey and **H. Li**	357	A flexible rectangular footing on a Gibson soil: required rigidity for full contact
A. K. Gautesen	375	A physical approach to asymptotically solving some integral equations occurring in solid mechanics
G. M. L. Gladwell	383	On contact problems for a medium with rigid flat inclusions of arbitrary shape
M. T. Hanson and **L. M. Keer**	391	Mechanics of edge effects on frictionless contacts
I. Jasiuk	407	Cavities *vis-à-vis* rigid inclusions: elastic moduli of materials with polygonal inclusions
K. L. Johnson	423	The adhesion of two elastic bodies with slightly wavy surfaces
X. Markenscoff and **M. Paukshto**	431	The correspondence between cavities and rigid inclusions in three-dimensional elasticity and the Cosserat spectrum
M. M. Mehrabadi, S. C. Cowin and **J. Jaric**	439	Six-dimensional orthogonal tensor representation of the rotation about an axis in three dimensions
M. J. Meisner and **D. A. Kouris**	451	Interaction of two elliptic inclusions

S. Nemat-Nasser and L. Ni 467 A duality principle and correspondence relations in elasticity

N. J. Salamon and C. B. Masters 473 Bifurcation in isotropic thin film/substrate plates

T. C. T. Ting 483 Generalized Dundurs constants for anisotropic bimaterials

M. Z. Wang and W. Wang 501 Completeness and nonuniqueness of general solutions of transversely isotropic elasticity

A. C. Wijeyewickrema 515 Decay of stresses induced by self-equilibrated end loads in a multilayered composite

C. H. Wu 525 Stress-induced phase transformations in solids and the associated double-well potentials

K.-C. Wu and Y.-T. Chiu 543 The elastic fields of a dislocation in an anisotropic strip

T. Yeo and J. R. Barber 553 Stability of a semi-infinite strip in thermoelastic contact with a rigid wall

Announcement

569 International Centre for Mechanical Sciences

NUMBER 5

S. S. Pageau, P. F. Joseph and S. B. Biggers Jr 571 Finite element analysis of anisotropic materials with singular inplane stress fields

M. Savoia and J. N. Reddy 593 Three-dimensional thermal analysis of laminated composite plates

T. W. Kim and S. Im 609 Boundary layers in wedges of laminated composite strips under generalized plane deformation—part I: asymptotic solutions

T. W. Kim and S. Im 629 Boundary layers in wedges of laminated composite strips under generalized plane deformation—part II: complete numerical solutions

K. Y. Lam and C. T. Loy 647 Free vibrations of a rotating multi-layered cylindrical shell

C.-C. Ma and K.-C. Huang 665 Wave propagation in layered elastic media for antiplane deformation

E. Reissner 679 A note on the shear center problem for shear-deformable plates

NUMBER 6/7

TIME DEPENDENT PROBLEMS IN MECHANICS

THE WOLFGANG G. KNAUSS ANNIVERSARY VOLUME

K. Ravi-Chandar and K. M. Liechti 683 Preface

	687	Selected publications by Wolfgang Knauss
S. Kyriakides, R. Arseculeratne, E. J. Perry and **K. M. Liechti**	689	On the compressive failure of fiber reinforced composites
R. A. Schapery	739	Prediction of compressive strength and kink bands in composites using a work potential
J. M. Comiez, A. M. Waas and **K. W. Shahwan**	767	Delamination buckling; experiment and analysis
S. Shkoller and **G. Hegemier**	783	Homogenization of plain weave composites using two-scale convergence
G. Losi	795	Ladder models for the constitutive behavior of heterogeneous materials with damage
I. Emri and **N. W. Tschoegl**	817	Determination of mechanical spectra from experimental responses
L. C. Brinson and **T. S. Gates**	827	Effects of physical aging on long term creep of polymers and polymer matrix composites
M. K. Chengalva, V. H. Kenner and **C. H. Popelar**	847	An evaluation of a free volume representation for viscoelastic properties
G. B. May and **A. S. Kobayashi**	857	Plane stress stable crack growth and J-integral/HRR field
K. B. Broberg	883	Dynamic crack propagation in a layer
R. J. Bonenberger and **J. W. Dally**	897	On improvements in measuring crack arrest toughness
L. B. Freund	911	Evolution of waviness on the surface of a strained elastic solid due to stress-driven diffusion
K. Ravi-Chandar	925	On the failure mode transitions in polycarbonate under dynamic mixed-mode loading
R. D. Pfaff, P. D. Washabaugh and **W. G. Knauss**	939	An interpretation of Twyman–Green interferograms from static and dynamic fracture experiments
Y.-M. Liang and **K. M. Liechti**	957	Toughening mechanisms in mixed-mode interfacial fracture
G. Ravichandran and **C. T. Liu**	979	Modeling constitutive behavior of particulate composites undergoing damage
C. T. Liu, C. W. Smith and **L. Wang**	991	Three-dimensional effects on stress intensity factor distributions and crack growth in motor grain models
P. H. Geubelle	1003	Finite deformation effects in homogeneous and interfacial fracture

NUMBER 8/9

W. Goldsmith and **D. L. Louie**	1017	Axial perforation of aluminum honeycombs by projectiles
K. Heiduschke	1047	The logarithmic strain space description
V. Tvergaard and **A. Needleman**	1063	Effects of nonlocal damage in porous plastic solids
H. C. Wu, J. K. Lu and **W. F. Pan**	1079	Endochronic equations for finite plastic deformation and application to metal tube under torsion
S. C. Shrivastava	1099	Inelastic buckling of rectangular sandwich plates
C.-L. Liao, T.-P. Chang and **D.-H. Young**	1121	Elasto-plastic constitutive modelling of granular assembly
J. Zheng and **Z.-P. Wang**	1135	Spall damage in aluminum alloy
J. Carmeliet and **R. de Borst**	1149	Stochastic approaches for damage evolution in standard and non-standard continua
M. E. King and **A. F. Vakakis**	1161	Asymptotic analysis of nonlinear mode localization in a class of coupled continuous structures
S. J. DiMaggio and **M. P. Bieniek**	1179	Nonlinear dynamics of flexible structures: a finite element approach
H.-C. Tsai	1195	The effects of tuned-mass dampers on the seismic response of base-isolated structures
S. B. Dong and **P. Etitum**	1211	Three-dimensional stability analysis of laminated anisotropic circular cylinders
P. Etitum and **S. B. Dong**	1231	A comparative study of stability of laminated anisotropic cylinders under axial compression and torsion
N. V. Smetankina, S. Y. Sotrikhin and **A. N. Shupikov**	1247	Theoretical and experimental investigation of vibration of multilayer plates under the action of impulse and impact loads
G. N. Karam and **L. J. Gibson**	1259	Elastic buckling of cylindrical shells with elastic cores—I. Analysis
G. N. Karam and **L. J. Gibson**	1285	Elastic buckling of cylindrical shells with elastic cores—II. Experiments
C. W. Bert and **T. K. Paul**	1307	Failure analysis of rotating disks
D. A. Danielson	1319	Analytical tripping loads for stiffened plates
		Announcements
	1329	AIMETA '95
	1330	International Conference on Engineering Computation and Computer Simulation

NUMBER 10

S. Abrate	1331	Stability and optimal design of laminated plates with internal supports
A. Kasagi and **S. Sridharan**	1349	Modal interaction in composite cylinders under hydrostatic pressure
H. P. Lee	1371	Divergence and flutter of a cantilever rod with an intermediate spring support
Guangyu Shi and **Pin Tong**	1383	Equivalent transverse shear stiffness of honeycomb cores
D. Johnson	1395	Yield-line analysis by sequential linear programming
M. Firer and **I. Sheinman**	1405	Nonlinear analysis of laminated non-circular cylindrical shells
L. M. Bezerra and **S. Saigal**	1417	Inverse boundary traction reconstruction with the BEM
Q.-C. He and **A. Curnier**	1433	A more fundamental approach to damaged elastic stress–strain relations
Hung-Sying Jing and **Kuan-Goang Tzeng**	1459	Analysis of thick laminated anisotropic cylindrical shells using a refined shell theory
	1477	Letter to the Editor
	1479	Authors' closure
		Announcements
	1481	Symposium on Recent Developments in Elasticity
